

About This Change Log

This document provides a record of updates made to the LION reporting system. It outlines key enhancements and relevant changes to ensure users are informed of new features, improvements, and fixes. By maintaining this log, we aim to support clear communication and help users understand how the system evolves over time.

Update Date	Report	Change Description
July 18, 2025	All	Fixed an issue with Support buttons not responding.
	All	Updated all dates with the same MM/DD/YYYY format (e.g. 5/31/2025)
	All	Fixed formatting on miscellaneous values and visuals.
	Inventory	The Vendor Ship Date and ETA Date slicers in the P.O. Status and History table were moved to the Filters pane of the table.
	Sales	Changed the RSP Orders and Shipments table to help with readability and exporting.
	Inventory	Changed the P.O. Status and History and On Hand Inventory tables to help with readability and exporting.
	Inventory	Added Size (ml) to Last 2 and 4 Week Cases Shipped table
	Pricing	Added Effective Date to Current and Historical Pricing table
	Pricing	Removed Status from the Current and Historical Pricing table as it was creating unnecessary records.
February 19, 2026	Inventory	On hand inventory is restored and shows accurate inventory based on stock levels as of the end of previous day.
	All	Updated Data Refreshed As Of date to also show time of data refresh.
	Product Attributes	Agency and Vendor columns were removed from the table to prevent duplicate product entries. User experience is not affected, since data remains filtered by the user's associated agency or vendor.
	Sales	Added Ship Date back to the RSP Orders and Shipments table
